HandiGenizer Handheld Homogenizer

Introduction:

HandiGenizer: The Ultimate Homogenizer for Fast, Smart, and Efficient Results.

HandiGenizer is a smart, handheld instrument that delivers fast and efficient homogeneous separation and emulsification. Our innovative technology works by circulating the sample in a narrow space between the high-speed, relative motion stator, and shear, breaking down the sample with ease. It is versatile and can be applied in a wide range of fields, including bio-pharmaceuticals, gene research, cell slurring, emulsions, and much more.

Features:

- **Smart and lightweight design:** HandiGenizer is designed to be operated with one hand, making it easy to use and carry around.
- **Digital display speed:** Our homogenizer is equipped with an adjustable speed and precise digital display speed control to avoid splashing.
- **Suitable for small sample containers:** HandiGenizer is perfect for homogeneous dispersion of a small amount of sample in small containers.
- **High-quality stainless steel dispersing head:** The anti-corrosion and high-temperature resistant properties of our stainless steel dispersing head make it easy to disinfect.
- **Easy to clean:** The dispersing head is easy to remove and clean after use.
- **High-speed and high-efficiency motor:** Our motor is engineered to provide high-speed and high-efficiency operation with a long lifespan.
- **Optional H-type stand:** Our optional H-type stand offers adjustable height and angle for convenient use and storage.
